

## DATA SHEET

# Wi-Fi Networking

Once you've got great connectivity into your building (that's something we can help with if you haven't!) the next step is to ensure that you, your team and your visitors can connect simply, reliably and securely, wherever they happen to be on site.

Our enterprise-standard Wi-Fi range squeezes every last Mbps out of your Internet connectivity investment. We'll help you to create a robust Wi-Fi environment that allows fluid movement of people, devices and data around your organisation.

 **ANDY HARDING**  
DIRECTOR, INTERNET CONNECTIONS LTD

## SEAMLESS.

Simple, intelligent management and unlimited scalability – site-wide Wi-Fi coverage that's reliable and secure too.

### Wi-Fi Networking at a glance

- ✓ **Quick and scalable:** The fastest, fuss-free way of distributing Internet connectivity right across your site...
- ✓ **Indoor and outdoor coverage:** Robust, industrial design ensures a seamless connectivity bubble for your organisation.
- ✓ **Simple to manage:** Software-based central control makes it easy to manage all aspects of your Wi-Fi environment from any device – be that desktop, tablet or smartphone.
- ✓ **Secure and highly customisable:** Set access privileges and policies for different user groups and create guest portals for visitors to your location.
- ✓ **Enterprise-level spec and performance:** The solution for today's bandwidth-intensive applications and the day-to-day reality of cloud, data-transfer, Internet telephony and HD video.

Get connected. Stay connected.

# CLIENT TESTIMONIAL

Andy made the whole experience straightforward and simple. I explained what I wanted to achieve – Andy made it happen. We now have exactly what we wanted: a reliable Internet connection to our remote office. Thank you!

Cathie Stone, Brookdale Clinic

## Typical project schedule

### Week 1: Requirements capture

- What's the size of the area you want to cover? Do you want to extend coverage to outdoor zones? Are there any isolated corners of your site that you need to pull into the network?
- Following our initial discussions with you, we'll put together a basic proposal to give you an idea of the costs involved.

### Week 2: On-site survey

- With your go-ahead, we'll come and visit your site to establish the finer, final details. We'll look at how many access points you'll need and exactly where they'll need to be installed to ensure that we're able to deliver the seamless Wi-Fi coverage that you need.

### Week 3: Installation, testing and handover

- We'll come and do the installation for you, before training your team to use the central management software so that you can view statistics, set up user groups with specific privileges and analyse your Wi-Fi environment with ease.
